## AGRICULTURAL RESEARCH ADMINISTRATION

### SERVICE AND REGULATORY ANNOUNCEMENTS

#### BUREAU OF ANIMAL INDUSTRY

OCTOBER 1946

This publication is issued monthly for the dissemination of information, instructions, rulings, etc., concerning the work of the Bureau of Animal Industry. Free distribution is limited to persons in the service of the Bureau, establishments at which official inspection work is conducted, public officers whose duties make it desirable for them to have such information, and journals especially concerned. Others desiring copies may obtain them from the Superintendent of Documents, Government Printing Office, Washington 25, D. C., at 5 cents each, or 25 cents a year (foreign, 45 cents). A supply will be sent to each official in charge of a station or branch of the Bureau service, who should promptly distribute copies to members of his force. A file should be kept at each station for reference.

#### ISSUANCE OF TRANSPORTATION REQUESTS AND REDEMPTION OF TICKETS

1. The Department desires that the following instructions be brought to the attention of all travelers and employees concerned with the issuance and use of transportation requests for sleeping or parlor car reservations or the redemption of such tickets. They supersede the instructions contained in the October, 1943, issue of Service and Regulatory Announcements.

2. Transportation requests must be issued for tickets prior to the train's departure under the same regulations that apply to the general traveling public for the purchase of tickets. Accordingly, accommodations are not reserved under the number of the transportation request but are reserved in the name of the passenger and are subject to currently effective time limits applying to any reservation. It is imperative that the block in the upper right hand corner of the memorandum transportation requests be completely filled out to show the class of transportation, number of persons traveling, and accommodations requested.

3. Itineraries should be carefully planned in order to avoid any unnecessary cancellation of Pullman accommodations. However, if a traveler finds that he will not use Pullman accommodations, it is his responsibility to immediately release the space reserved since the requests issued for Pullman tickets become a liability of the Government. When cancellation is effected, the traveler should make every effort to obtain the return of the original transportation request in exchange for the canceled ticket. If it is not possible to secure the original transportation request, the traveler should send to the Bureau the unused ticket, the memorandum copy of the transportation request and a statement showing the reason for non-use and the action taken to release the space. *A notation that the reservation was not used, a reference to the letter of explanation, and a description of the unused ticket should be noted under item 3 on the reverse side of the memorandum copy of the transportation request.* It is also imperative that whenever the service furnished differs from the service requested, the actual accommodations used be indicated on the reverse side of the memorandum copy of the transportation request. *This information is necessary to facilitate the processing of required adjustments in such instances. The memorandum transportation requests should accompany the reimbursement account when it is transmitted to the Bureau.*

4. Under no circumstances should unused tickets which were procured with transportation requests be redeemed for cash by a traveler.

5. *A. Cancellation of Reservations PRIOR to Departure of the Train and Redemption of Tickets by Ticket Agents.*—Where it becomes necessary to release reservations previously secured on transportation requests, cancellation of the reservation should be made if possible prior to the departure of the train as outlined below:

(1) The traveler should attempt to obtain the original transportation request upon presenting the Pullman ticket to the city or depot ticket agent for exchange. If the unused Pullman ticket cannot be exchanged for the transportation request, the traveler should not release the ticket but should have the ticket agent mark it "canceled—space released prior to departure." The ticket and the memorandum copy of the transportation request should be forwarded to the Bureau for disposition.

(2) Sleeping or parlor car tickets may be redeemed by city or depot ticket agents irrespective of the office at which sold if presented not later than the day in advance of departure of trains for which sold to permit reservations being released and replaced on sale. Pullman tickets sold for space in a car *placed for occupancy before 12:00 midnight*, but scheduled to depart at or after midnight, will be considered as having been sold for space in a car departing on date car was *placed for occupancy*. For example, Pullman tickets for accommodations in a car placed for occupancy at 11:00 P. M. on September 20, and scheduled for departure at or after midnight, would have to be presented for cancellation not later than midnight on September 19. Tickets for *seat* accommodations in sleeping or parlor cars may be canceled by agents if presented sufficiently in advance of departure of trains for which sold to permit reservations being released and replaced for sale.

(3) If the cancellation is made by telephone, the traveler should record on the reverse side of the unused Pullman ticket the name and location of the Pullman Company agent who was requested to release the space and the date and time of release. The ticket and memorandum copy of the transportation request should be forwarded to the Bureau for disposition.

(4) Tickets sold for trains abandoned at starting point or where accommodations are not available may be redeemed by city or depot ticket agents.

(5) Tickets held by travelers for accommodations which were not available for any reason should be handled in the same manner as outlined in (1), (2), (3), and (4) above.

*B. Cancellation of Reservations AFTER Departure of Train.*—In some instances it may not be possible to cancel reservations prior to departure of the train due to late arrival of a connecting train. In such cases it is important that the traveler adhere to the instructions given in items (1) and (2) below.

In other cases where it is not possible to cancel reservations prior to the departure of the train, it is the responsibility of the traveler to cancel the reservation and release the space for resale as soon as possible after the departure of the train. It is suggested that the traveler request the Pullman agent to telegraph the Pullman conductor or an agent on the route of the train to release the space for resale. The ticket agent should be requested to mark the ticket accordingly. The ticket, memorandum copy of the transportation request and statement of facts should be forwarded to the Bureau for disposition.

(1) In cases where non-use of a Pullman ticket is due to the late arrival of a train which caused the traveler to miss connections, he may (a) exchange his reservation for accommodations on another train departing not later than the day following his arrival, requesting the Pullman agent to write on the ticket, "New reservation on account of missed connections due to delayed arrival of train No. \_\_\_\_\_, via \_\_\_\_\_ RR."; or (b) continue to travel by other means, requesting the Pullman agent to write on unused ticket, "Canceled on account of missed connection due to delayed arrival of train No. \_\_\_\_\_, via \_\_\_\_\_ RR.". The unused portion of the ticket and the memorandum of the transportation request, together with a statement of facts, should be transmitted to the Bureau.

(2) If new accommodations obtained under (1) (a) above are of greater value than the original accommodations reserved, the traveler will adjust the difference by either issuing a transportation request for the difference in value, or paying the difference in cash, obtaining a receipt for the amount

paid and claiming reimbursement on a travel voucher not to exceed the lowest first-class rate. (See Paragraphs 8 and 10 of October, 1943 notice.) *If accommodations of less value are received the difference should be noted on the ticket and on the back of the memorandum copy of the transportation request transmitted to the Bureau.*

6. In all correspondence and records, care should be taken by travelers and others to identify transportation requests by number and tickets by ticket number, place of issue, and number of issuing station (the station number is found in the lower left-hand corner of the stub or passenger's check, e. g. 11-2). *Failure to identify related correspondence, tickets, and transportation requests may delay unduly the settlement of an individual case.*

7. A complete explanation, showing the amount to be paid by the Bureau and the amount paid in cash by the traveler, should be made on the reverse side of both the original and memorandum (white) copy of the transportation request, as well as on the traveler's reimbursement account.

8. Charges for unused or partially used tickets which the traveler did not release due to his own negligence will be deducted from his reimbursement account or collected from him.

### STOCKYARDS INSPECTION WITHDRAWN

Effective October 1, 1946, public stockyards inspection was discontinued at Dayton, Ohio, and this point has been removed from the list of stockyards at which Bureau inspection is maintained in accordance with Regulation 1, section 1, paragraph 8, B. A. I. Order 309.

### DR. A. K. KUTTLEHEADS TUBERCULOSIS ERADICATION DIVISION

Dr. A. K. Kuttler, inspector in charge of veterinary field activities in Illinois, has been appointed head of the Bureau's Tuberculosis Eradication division. He succeeds Dr. A. E. Wight who retired recently.

Dr. Kuttler is a native of Kansas and a graduate of the San Francisco Veterinary College. He entered the Bureau in 1917 and has served it continuously since that time with the exception of short periods of duty in the Veterinary Medical Reserve Corps of the Army and as deputy State veterinary inspector in Idaho.

He assumes his new post with a background of experience in responsible positions in many extensive disease-control projects, including the eradication of cattle-fever ticks, tuberculosis, brucellosis, and sheep scabies. He has participated also in the control of hog cholera and other diseases. His new work is mainly to direct the Nation-wide eradication of bovine tuberculosis and brucellosis in cooperation with State officials and livestock owners.

### AMENDMENTS TO DEPARTMENT REGULATIONS

The following amendments to the regulations of the Department have been issued:

- Amendment 224, covering regulation 1414.
- Amendment 225, covering regulation 1712.
